Custom software that works the way you do

We help organisations in logistics, healthcare and education simplify their processes with software that fits.

> *“Just connect the dots” is a philosophy that argues that processes that appear disjointed actually form a clear, fluid, and meaningful system when properly linked. Circle Solutions uses this approach to simplify complexity, connecting every point to provide businesses with a holistic digital workflow.*

CORE PLATFORM

CIRCLE D.O.T.S.

Circle D.O.T.S. is a modular digital office tools platform that helps companies make their internal processes more efficient.

- It allows teams to track their workflows, tasks, and activities from a single hub.
- It enables leaders to make informed decisions with real-time reports and operational insights.
- It provides fast and scalable support for onboarding and integration processes.

End-to-End Core Capabilities

Modular platform
Unified workspace connecting communication and daily operations.

Tailored software
Custom digital tools engineered around existing team habits.

Direct integration
Smooth data flow across all enterprise tools and systems.

Our Core Philosophy & Values

We strip away software complexity so your team can focus on what matters most.

Simplicity
We strip away unnecessary complexity to make digital workflows effortless.

User-Focused
Designed around real people to make everyday operational tasks intuitive.

Reliability
Built on stable software to guarantee smooth operations without downtime.

End-to-End Digital Services

Transforming complex technology into measurable business results.

Custom Software Development
We construct tailored digital solutions designed to match your exact business processes and operational models.

Web & Mobile Products
We develop clean, high-performance web applications and mobile apps for seamless accessibility on any device.

Process Automation
We eliminate manual repetitive tasks by building intelligent workflows that speed up daily business execution.

Cloud & Digital Infrastructure
We build modern cloud architectures ready for growth, keeping data secure, accessible, and dependable.

Data Integration
We bring all your standalone corporate software systems into a single, unified, and real-time data flow.

Technology Consulting
We advise leadership teams on key software decisions, helping choose the right stack for long-term scalability.

Key sectors we serve

Logistics | Education | Healthcare | Custom

Our Journey and History

From a local software agency in Amersfoort to an international software partner.

2005 **Circle Solutions was founded** in Amersfoort by software engineers Fennema and Aksos to provide custom software development for local logistics companies.

2008 Expanded operations into healthcare and education, while continuing to focus on practical, reliable, and user-friendly software.

2018 **Circle D.O.T.S.** Office tools launched. Today, Circle Solutions design team helps organisations across Netherlands, Belgium, and Germany simplify internal operations.

Why are we different?

To ensure that our clients around the world can benefit from your company's services, we offer the ability to conduct all project processes online. We prioritize customer validation and provide our clients with immediate solutions through weekly meetings during the design process.

100% Reliability
Built on stable software architecture guaranteeing continuous operation without unexpected downtime.

Online Support (<24h Response)
Direct digital communication channels ensuring rapid turnaround times and immediate problem resolution.

Global Reach
Serving enterprise clients across Netherlands, Belgium, Germany, and international digital teams.

User-First Design Philosophy
Every solution has a real user experience at its center— fast, friendly, and tailored to daily habits.
